Foreword

IT IS indeed a great pleasure to present our 1952 catalog to you. We want you to know that we certainly appreciate your many fine orders, and hope that we can continue to serve you again this year.

Although it is impossible to grow all the new varieties coming on the market each year, we try to the best of our ability, to catalog the most promising of them. We feel that any selections you may make, will, if given proper growing conditions, reward you with superb blooms.

Our bulbs are grown under the best cultural practices on new land each year. This is organically rich soil and produces clean, high crowned young bulbs that give the best results. Our bulbs are cured in a modern storage and handled with utmost care. They are inspected in the fields and storage by competent State Inspectors and certified free of disease and insects.

If you have not previously ordered from us I would like to suggest that you give us a trial and become one of our host of enthusiastic customers. We will do our utmost to please you and hope you have a gorgeous display of our flowers this coming year.

Small Bulbs average ½" in diameter and often bloom, but with smaller spike.

Bulblets—The little hard shelled cormlets from which bulbs are grown.

FOR A REAL THRILL GROW SOME

Gladiolus from Seed

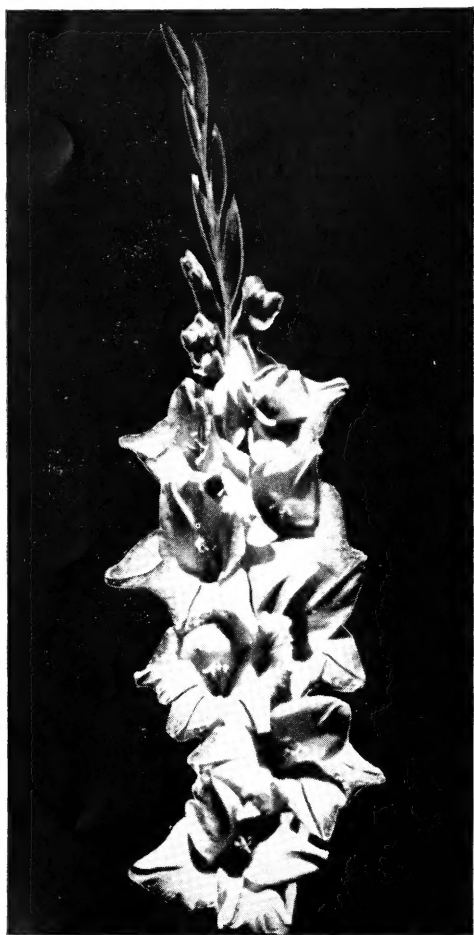

Growing gladiolus from seed offers a thrill that comes with creating something new. Each seed produces a new and different variety and with the seed we offer you have a good chance of getting some very fine new gladiolus.

We have selected seeds from our show garden where only the newest and finest varieties are grown, including some of the varieties being introduced this year. We are offering them in a mixture that assures you a far greater variety than seed from a single cross.

Seed should be planted $\frac{1}{2}$ " deep as soon as the ground can be worked, and kept moist at all times. The bulbs harvested should for the most part bloom next year.

Pkg. of 25 seeds 50c (60 - \$1.00)

6 - \$1.00 pkgs. for \$5.00
